

Sprint 5 completed requirements  
Group 13: Jowaki Merani, Zui Nagarkar, Eduardo Sanchez, Parveen Kaur

### Implementing front end check in questionnaire

completed the questionnaire front end where the user will enter how they are doing on a given day. This is a static feature as of right now. However, we plan on utilizing a timer that pops up every 24, 48 or 72 hours. This timing has yet to be decided. We also plan on utilizing this data in the future for our future projects.

Mindly

Daily Check-in

How Am I feeling today?

What has been worrying me lately?

What happened today that made me really happy?

Have I been socializing less?

Who do I have in my corner?

Homepage

### Create a table for checking the questionnaire in the database.

The table created for the questionnaire. This will store what the user inputs in each respective box for the questions.

"How are you feeling today?"

"What has been worrying me lately?"

"What happened today that made me really happy?"

"Have I been socializing less?"

"Who do I have in my corner?"

### Implementing UI for profile page.

We decided on a profile page so that the user will see various tools for their app. The UI for profile page which allows users to change settings. This will be expanded in a future sprint. As

of right now what's been implemented is a prototype. This is not the best design - we will work on beautifying this in future sprints.

### **Implementing backend for profile page.**

This required us to link the frontend and backend of the profile page. Allows the functions to be used in the profile page. As we experienced with implementing the backend for the journal entry, we had to use a separate MONGO\_URL. Along with tweaking the frontend code for compatibility reasons.

### **Look for options for Music Department.**

We connected with Dr Johnson regarding this issue and were connected to Dr Gibbons who helped us reach out directly to students who would be interested in volunteering. We will have a finalized list after thanks giving.

**From:** Johnson, David Orville <davidjohnson@ku.edu>  
**Sent:** Tuesday, November 15, 2022 10:28 AM  
**To:** Merani, Jowaki <jowakimerani@ku.edu>  
**Subject:** Re: EECS 581 - Possible compensation for the Music department

I have found a professor in the music department to work with that Dr. Gibbons knows. He has asked his students for volunteers. He is going to get back with me after Thanksgiving with a list of student names.

I did not mention any compensation.

I'll let you know more when I know more.

David

 To Merani, Jowaki

You're welcome!

**Subject:** RE: EECS 581 - Possible compensation for the Music department

That's amazing!

Thanks a ton for all your help!

Thanks & Regards,  
Jowaki

### **Implement a resource page.**

The resource page is what links users with various free hotlines and URLs when needed. One of the best reasons to implement this is that various mental health resources are free such as National Suicide and Crisis Hotlines, and National Grad Crisis Lines. This has been completed - Will be demonstrated during the demo.

### **Link calendar to respective journal entries**

We have successfully linked the calendar to the journal entries. The journal entries show up as an event that was generated. Clicking on the dates links us to the journal entry which can be added for a day. This has been completed - Will be demonstrated during the demo.
